

# This is a test!

Like, literally, it's a test of the PDF PDiff Java library

So let's get creative here, and put in an image:

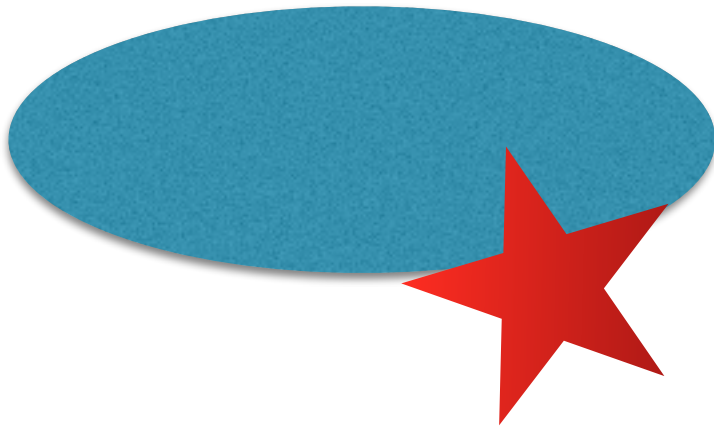

Maybe a table:

	Column 1	Column 2	Column C
Row 1	14	17	72
Aisle 2	7623472938	Bang	Flop
Row C	Q		

# And we definitely need a second page

Because otherwise it would be boring and crud.

While we're here, I'ma draw a shape or two

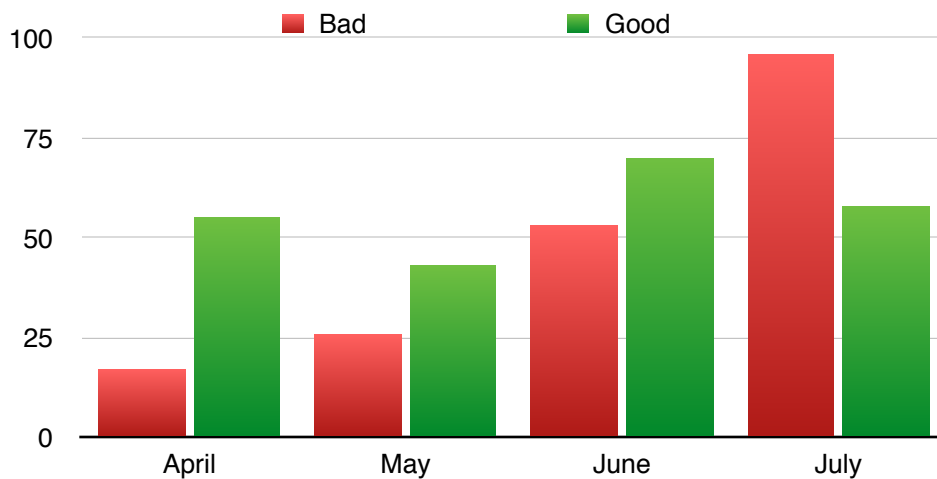

# And on page 4... er, 3...

Let's put a picture of a donkey!

Wait, I don't have one....

Ok, how about a chart!

Yikes, clearly we're degrading there... how about a 3D one!
